**Customers benefit from the BSP-TEX Quality Guarantee & exceptional customer service.**

TROJAN

 Hire

## Trojan Asphalt Mixers

**BSP-TEX Trojan mastic and asphalt mixers are available in two sizes, ranging from 600kg (12cwt) to 900kg (18cwt). Choose from static or road trailer models.**

The road trailer models have EU Whole Vehicle Type Approval (EUWVTA), and the freestanding units are suitable for truck mounting. The Trojan Scorpion 600kg (12cwt) model is extremely compact and manoeuvrable, perfectly suited to small contracts, and the Trojan Crusader with a larger capacity can handle most jobs. Call our Technical Sales team to discuss your requirements.

**Capacity**  
**600–4,000 kg**  
**(12cwt–4t)**

**Choose from**  
**road trailer or**  
**static options.**

## Towable Hotbox

**Reliable and efficient, 2.5t, towable hotbox for heating and transportation of asphalt. With thermostatic control.**

The Model HB2T has two twin compartments and the 2 x 19kg propane bottle gas heating system is self-contained and does not use the towing vehicle's electrics. The walkway platform allows easy access to the gas bottles and lids.

Twin-axle Type Approved road trailer. Requires a towing vehicle capable of towing 3.5 tonne Gross Vehicle Weight at a minimum.

Set the machine to the desired temperature, and the burners automatically cycle on and off and maintain a constant temperature. Gas consumption approximately 0.2kg per hour.

**Capacity  
2,500kg  
(2.5t)  
(1.4m<sup>2</sup>)**

**Thermostatic heating control and maximum fuel efficiency.**

## Weiro Asphalt Emulsion Sprayers

**A self-propelled bitumen sprayer on a 4-wheel chassis, for the reliable and accurate application of all kinds of cold-liquid tack-coating materials and bitumen emulsions, including polymer-modified binders.**

The Weiro TM 804 SH is used for producing the adhesive bond between layers with asphalt emulsions according to TL BE-StB 15 (Technical Terms of Delivery for Bitumen Emulsions 15) and adhesives. Driven by a diesel engine (water-cooled), with diesel particulate filter, emission stage V according to EU 2016/1628. Certified according to DIN EN ISO 3471:2010-01.

**Net Capacity  
800L (176 gal)**

**Hydrostatic drive  
with electronic  
cruise control.**

Made in the UK

- **Self-filling from external containers with suction lance**
- **Bonding agent circulation during the heating process**
- **Can be sprayed using a spray bar or a hand-held lance**
- **Can be cleaned with compressed air by rinsing out all pipes, hoses, and the pump**

**Left:** The computer-aided dosing control with LCD control unit to the right of the driver's place is an optional extra for the precise control of the binder application rate ( $\text{kg}/\text{m}^2$ ), independent of driving speed and working width.

**Left:** Spray bar with electro-pneumatic individual nozzle switching.

BITMEN

»»» Hire

Product Code: 104IR

## Bitmen Infrared Asphalt Heater 620mm x 550mm

The propane gas-fired infrared asphalt heater is used to repair asphalt surfaces. The seamless repair will prevent secondary failure, due to weather ingress and provide a permanent solution. This single front wheel model is perfect for small areas and road repairs around drains.

The heat penetrates the asphalt, softening the binder content to a point where the material becomes workable. Other systems which use a naked flame tend to burn and destroy the road surface, whereas infrared heat does not impair the quality of the material.

**This single front wheel model is highly manoeuvrable – ideally suited to road repairs around drains.**
