Towable Hotbox

Reliable and efficient, 2.5t, towable hotbox for heating and transportation of asphalt. With thermostatic control.

The Model HB2T has two twin compartments and the 2 x 19kg propane bottle gas heating system is self-contained and does not use the towing vehicle's electrics. The walkway platform allows easy access to the gas bottles and lids.

Twin-axle Type Approved road trailer. Requires a towing vehicle capable of towing 3.5 tonne Gross Vehicle Weight at a minimum.

Set the machine to the desired temperature, and the burners automatically cycle on and off and maintain a constant temperature. Gas consumption approximately 0.2kg per hour.

Capacity
2,500kg
(2.5t)
(1.4m²)

Thermostatic heating control and maximum fuel efficiency.
